

The Ultimate List of Must-Have **CLM** Software Features

#1 Contract Repository

To provide you with a single, secure, & accessible place to organize, store & track all contract-related information besides enabling a 360-degree view of all your contractual relationship in a single-page view.

#2 Contract Lifecycle Management

For standardizing your contract management process including workflows, tasks, reminders & notifications for contract renewals, obligations, milestones & pending activities.

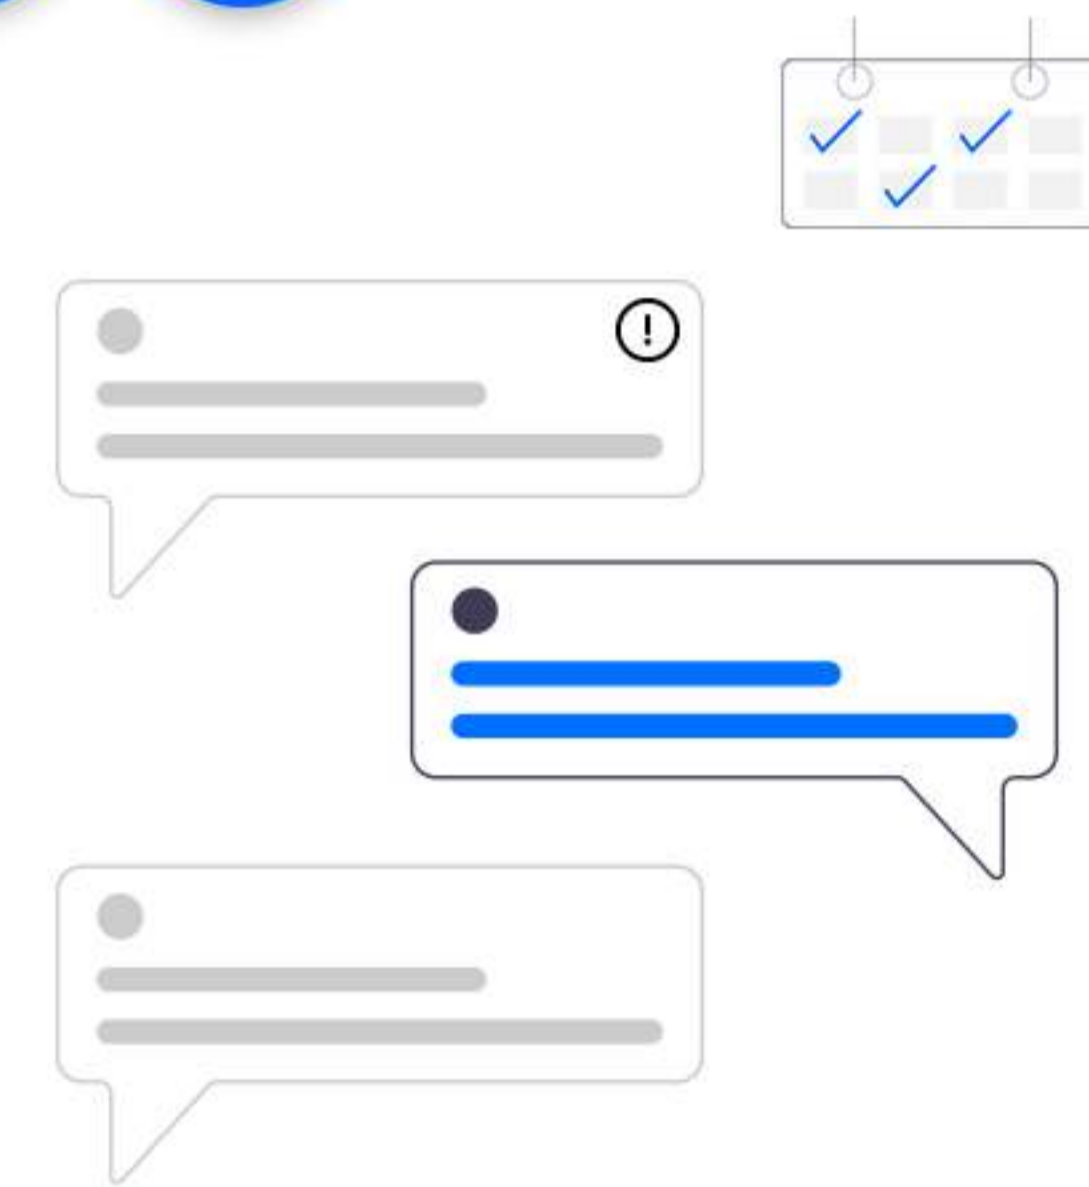

#3 Smart & Convenient Search Functionality

To help you find contract records, documents, or counterparties with a simple keyword search besides providing you with search refinement capabilities.

#4 Timely Alerts

For timely reminders & alerts for important dates that need to be tracked as part of the contract lifecycle.

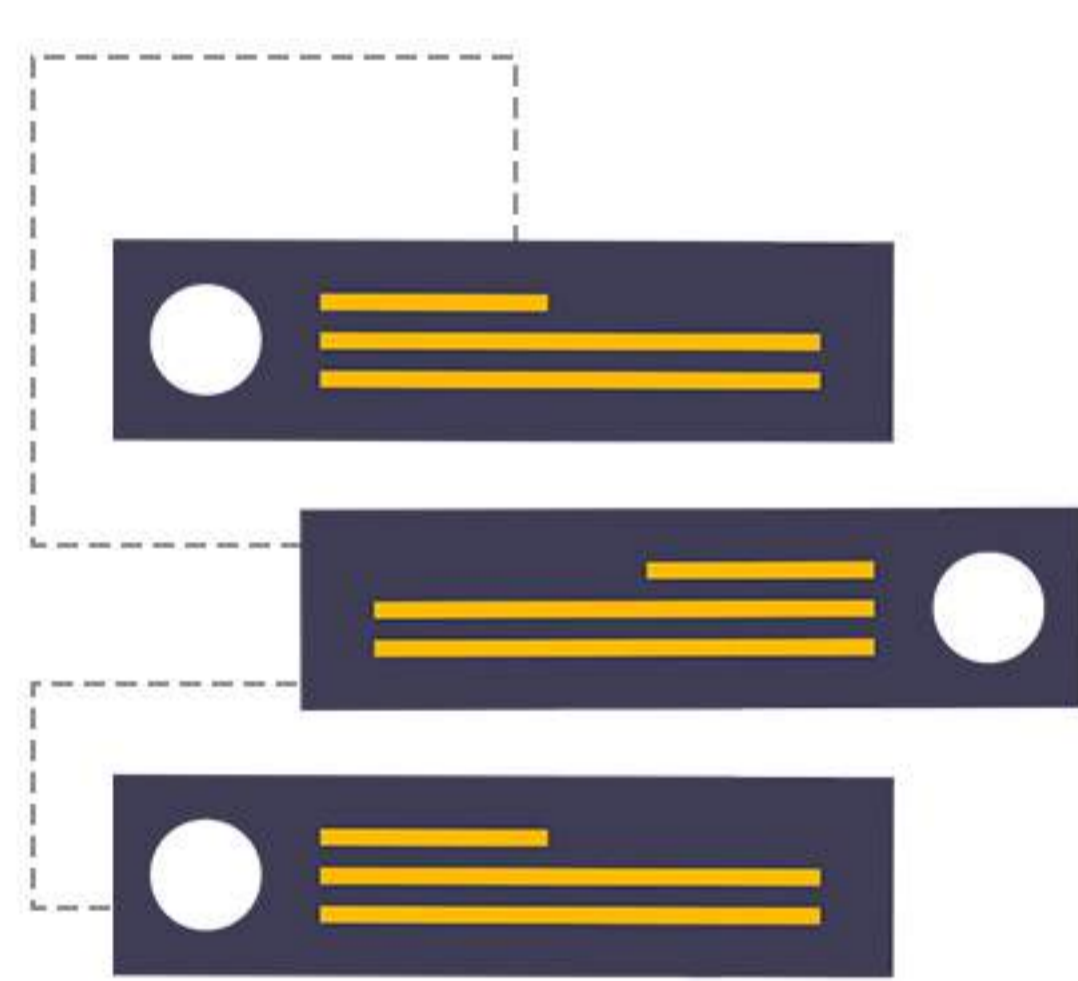

#5 Contract Template Authoring & Document Automation

To help in the faster implementation of frequently created contract documents using pre-approved legal & business templates.

#6 Automated Workflows

To allow your team to design custom contract workflows that regulate the tasks involved in submitting, reviewing, collaborating on, & approving contracts in a standardized way.

#7 Reporting & BI Capabilities

To quickly analyze data visually in an efficient manner while giving you a powerful, cloud-scale analytics & data visualization within the contract lifecycle.

#8 AI-Powered Discovery & Analytics

To enable extraction of key information like counterparties, renewal milestones, obligations, phrases, & provisions from thousands of contracts as well as utilizes AI capabilities to find variance in the clauses of contracts.

#9 Electronic Signature

To enable a faster legal way to get stakeholders' consent on contracts & documents while providing additional advantages such as security, verification, & audit capabilities to enterprises.

#10 Office 365 & Word Integration

To provide you with a consolidated, collaborative, & intelligent contract management experience by bringing together contract metadata, documents, dashboards, activities, & workflows.

Why eContracts?

eContracts is an intelligent cloud-based Contract Management software developed on the Azure cloud platform. It supports end-to-end contract lifecycle process automation and provides deep, seamless integration with the Office 365 product suite.
